DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Bays et al.-6,423,078.

Bays-'078 (Fig. 1-4) discloses a dermabrasion device comprising abrading structure 40 having undulations (Fig. 6), coupling 46 (Fig. 1) connecting to a suction source (not shown), coupling 30 (Fig. 1 and 3) connecting to an irrigation source (not shown) for providing a fluid to port 36 (Fig. 2) and inherently a method as recited in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bays et al-6,423,078 in view of Kligman et al.-6,869,611.

As to claims 5-8, Bays et al-6,423,078 discloses substantially all limitations recited in the claims, except for the fluid is an active agent for treating skin such as citric acid, lactic acid, alpha-hydroxy acid, glycolic acid. However, Kligman-'611 (col. 1, lines 38-49, for example) discloses glycolic acid, citric acid, lactic acid, alphahydroxy acid as popular agent for treating skin. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a skin treatment agent as disclosed by Kligman-'611 in an irrigation fluid as recited in the claims as the skin treatment agents are well known agents for treatment a skin.

2. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bays et al-6,423,078 in view of Molinari-5,037,432.

As to claim 9, Bays et al-6,423,078 discloses substantially all limitations recited in the claims, except for the fluid is provided with a crystalline abrasive. However, Molinari-'432 (col. 2, lines 17-24, for example) discloses providing micro-crystals of quartz, corundum in a fluid as abrasive to treat a skin surface. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide micro-crystals of quartz or corundum in a fluid as an

Art Unit: 3773

abrasive to treat a skin surface for a Bays-'078 device, as providing these abrasives are well known as disclosed by Molinari-5,037,432 for treatment of a skin.
